Agile

Adaptive

Aligned

Mobile App Development Services

We design responsive and adaptive Progressive web Apps(PWA), or hybrid apps, that combine the responsive, native feel of an iOS or Android mobile app with the scalability and interoperability of a web app. PWAs include features like push notifications, easy social sharing and superior indexability

Full Stack Web Development Services

We build attractive commercial websites that are create with ease of use, SEO, mobile-first responsiveness, conversion optimization, advanced search capabilities, load speed and a modern design aesthetic in mind.We have plenty of experience working with website builders and CMS's, like WordPress, Joomla and Drupal

Internet of Things

Our technology department expertise in all areas of custom IoT development solutions. We have wide experience in the field of Internet of Things, as we have developed ready to sell IoT products and services, which has been featured in various expos across the globe. Our IoT services have been recognized globally.

Web Integration Services

Consolidating disparate enterprise web applications helps organizations streamline workflows and simplify mission-critical processes. We provide custom API development and integration services for Service-Oriented Architectures (SOA) using REST and SOAP protocols to facilitate bi-directional JSON and XML communications

Animation & Graphic Web Design Solutions

An engaging website or application demands a dynamic, attractive design. Our web design specialists leverage 2D/3D design tools like Web Graphics Library(WebGL) and Open Graphics Library(OpenGL), as well as several JavaScript and CSS frameworks like Animate.css, Bounce.js and Magic Animations.

Digital Matketing

We are one of the top Social Media Marketing SEO serrvice providers in Qatar. Our experts will helps you to market your business through the social media platforms like Facebook, YouTube, Instagram, Pinterest, Twitter, LinkedIn, and blog networks. Connect with us and grow your business.

Web Application Development Services

We are a full-stack software development company. Our back-end developers are experts in Java, PHP, Ruby, Python, and SQL, as well as frameworks like Django and Laravel, while our front-end designers know their way around Javascript, CSS3 and HTML5.

Enterprise Web Apps Solutions

Our industry software experts have years of experience building business automation web solutions for a number of verticals. We use custom APIs and our mastery of web services to build web-based automation services for applicants like inventory control, digital marketing and customer relationship management.

Web Portal Development

Our web developers program public-facing portals as well as enterprise intranet dashboards that incorporate email and internal messaging, forums, search engines, workflow and task managers, new tickers and multimedia hosting. For private portals we integrate protocols like Role-Based Access Controls(RBAC) and Single Sign -On(SSO).

E-Commerce Web Apps

We build both commercial e-commerce websites designed to optimize customer satisfaction and drive sales, as well as internal web apps for aiding in businessautomation. Leveraging our partnerships with Magento and Shopify, we can develop and integrate digital storefronts, shopping carts, catalogues and payment solutions using their platforms

Project Models

Fixed Cost Model

If your company or you has a fixed set of software development requirements or ideas for creating new solutions or service, then the fixed cost model will be the best suited for you.

T & M Model

You can hire our dedicated resources as well. They will only be working on your project. A daily timesheet of your work will also be submitted to you. Even though you hire dedicated resource.

Hourly Model

If you or your company has software development requirements that would demand adopting changes and flexibility, then the hourly model is best suited for you.

Partner With Us

You can also partner with us for your growth, diversification on a mutual benefit basis. We will give you qualified and experienced professionals with sound domain knowledge

Methodology & Framework

Agile Methodology

01

Evaluation of processes & current structure of the company

Mapping processes to determine the starting point and the 'Actual State'

05

Evaluation & monitoring

These determine KPIs, reports and other metrics, per user, in order to monitor that the process is working as agreed.

02

Suggestions for improvement & process optimization

Optimize a process with a right combination of technologies

04

Application, construction & implementation

Weekly delivery of developments for the end user to operate and request for changes. It is IDEAL that the end user is part of the process of development and testing.

03

Application design together with the client

We choose technologies and review options with the client. The client is part of the project from the very beginning and feed back is VITAL
